We want to tell you about
professions which are
interesting for modern
students.

future professions

- lawyer
- doctor
- military man
- welder
- vet
- teacher
- designer
- journalist
- architect
- pilots
- football player
- astronaut
- musician
- scientist

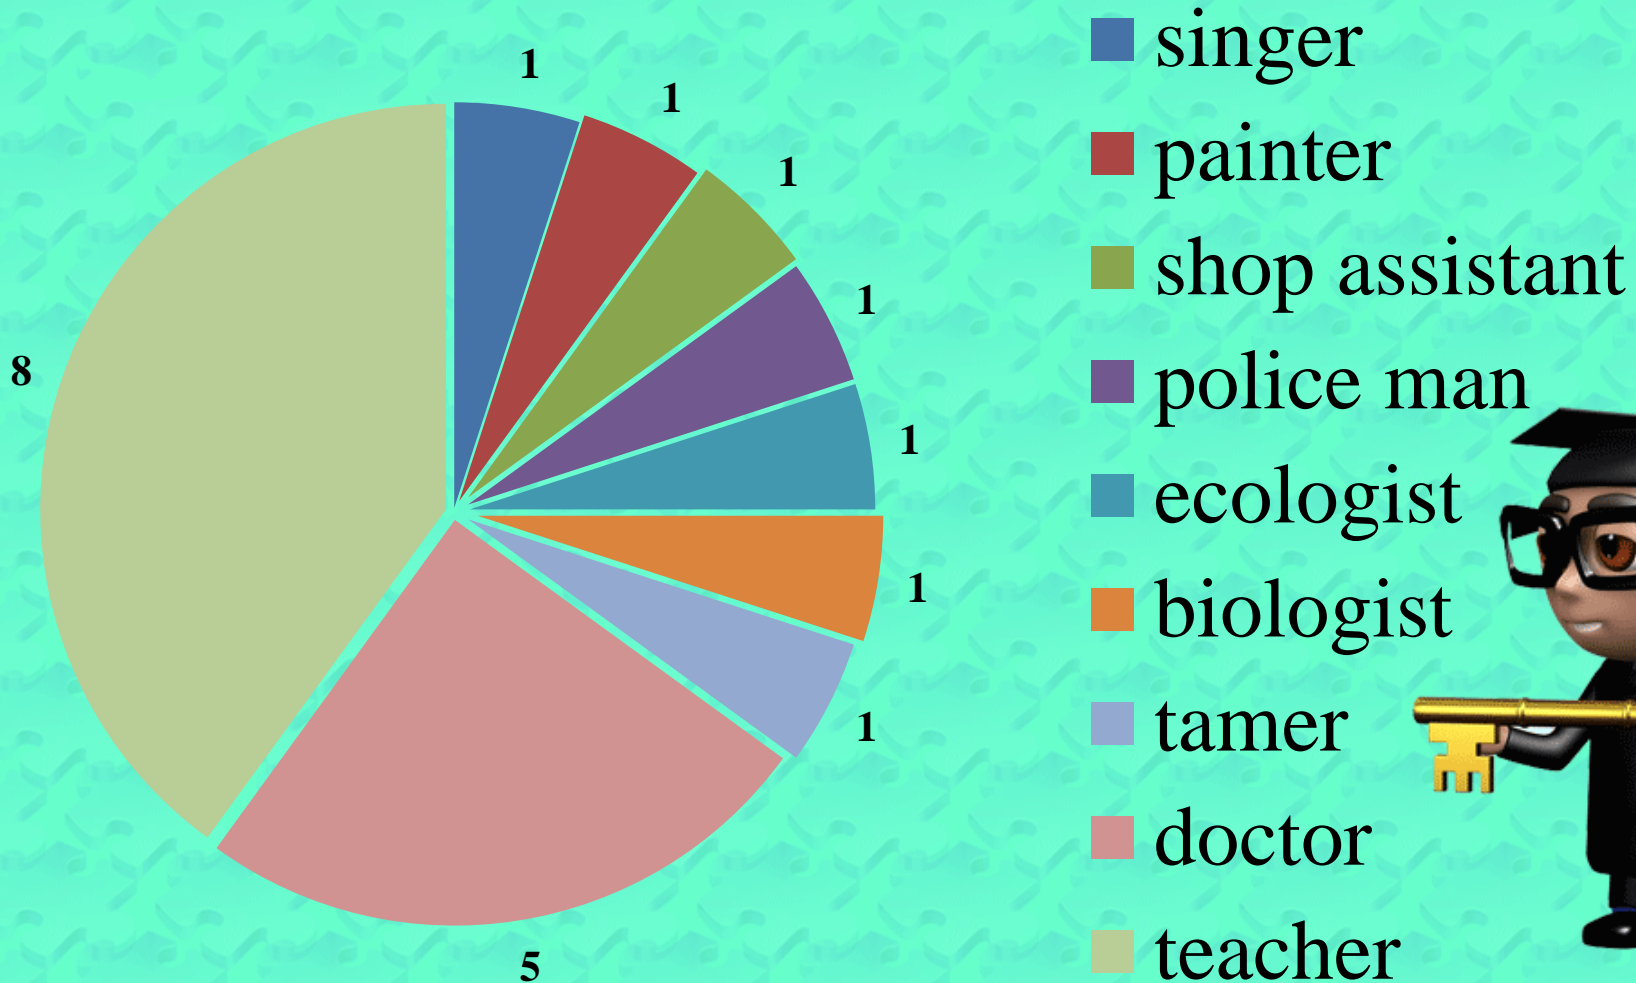

All children at the same age as we want to become lawyers, doctors, military people and so on.

In childhood we often dream of becoming a doctor for example, but some years later we`ll become a lawyer or anyone else. Things can change over time. We tried to find out if our dreams can come true.

teachers` dreams

As for me, I want to become a painter in the future. I really like drawing. I'm rather good at it. Earlier I just draw with crayons without an outline and eraser.

Now I paint
carefully to get the
beautiful result.
Some years ago I
didn't like to use
paints and now I
like to paint with
watercolours.

And I want to be a professional cheerleader. I know that it isn't a profession but I really like cheerleading. I like the atmosphere in our team.

I dream of becoming a vet. This is a very useful profession because it helps to treat animals. For the treatment of animals you need a lot of knowledge and experience.

I love animals and even feed some homeless people on the street. And when my cat got sick I gave it medicine from a spoon, vitamins and fed chicken broth.

For the cat's immunity and health I regularly give my cat fish oil. It is very useful and the cat loves it very much. The main thing for me is to make my pet healthy and happy. I try to get as much knowledge as I can at school to active my dream.

My name is Diana. I am 11 years old. I began to do rhythmic gymnastics at the age of 4. Daily trainings, numerous trips, participation in competitions, cups, medals, certificates...It's all I live for and this is the meaning of my existence.

In future I really want to become a gymnastics coach. I want to show on my own example that it is necessary to set goals and work to achieve them.

Today my purpose is to get a Master of Sports.

Like most girls I also have my idols: Margarita Mamun, Jana Kudryavtcheva, Dina and Arina Averiny, Polina Shmatko. As they I would like to participate in international competitions representing our country. I think I will succeed.

I`m only 8 and I don`t want to be an active sportsman as my elder brother. I think it can be dangerous and you can get injured. I want to become a well known chess player. I began playing chess at 5. Now I have the 2nd sport category in chess.

I got two silver and one gold medals in city's tournaments. This year I got the 3rd place in chess competition among boys under 9 in Saratov region.

In November I also took part in competition between boys from Tatarstan, Bashkortostan, Udmurtiya and other Republics and regions which took place in Samara.

I have chess lessons twice a week. I believe if you want to succeed and do your best, you`ll realize your dream one day.

I want to become a professional dancer. I know that it isn't a profession but I really like dancing.

Conclusion

That is what we want to become in the future. The main thing is to believe that we will become exactly what we want and the fate will decide everything itself. Perhaps some years later we`ll become your colleagues.

Thank you very much
for attention.
